Message from the Guest Editors

To cope with the environmental, societal, and economic challenges of energy systems, while exploring the opportunities of recent advances in science and technology, this Special Issue aims to serve as a platform for energy researchers to present their recent works that contribute to deriving sustainable future energy systems. Both theoretical and practical research on technologies, analysis, and designs, which address the sustainability, complexity, efficiency, and resiliency of future energy systems, are welcome. Special attention will be given to studies on emerging technologies, such as machine learning and artificial intelligence, distributed ledger technologies, etc., for solving emergent challenges on the cybersecurity and resilience of energy systems under cyberattacks and natural disasters, which have not been accounted for in other Special Issues.

Deadline for manuscript submissions:

15 November 2021

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [Inspec](#), [AGRIS](#), [RePEc](#), [Chemical Abstracts](#), and many [other databases](#).

CiteScore (2019 Scopus data): 3.2; ranked 132/679 (Q1) in "Geography, Planning and Development", 26/82 (Q1) in "Environmental Science (miscellaneous)", 74/216 (Q2) in "Energy Engineering and Power Technology", 118/333 (Q2) in "Management, Monitoring, Policy and Law", and 79/179 (Q2) in "Renewable Energy, Sustainability and the Environment".
